

Directory for *Highland* County

Artisan studios are often open by appointment, some do not allow visitors. Please call ahead to discover where and when the artisan's work can be viewed. While some do not have web sites, many artisans sell through commercial venues including galleries and craft shows.

Venues include galleries, stores, museums, and other related places of interest. Some of the venues might carry a limited number of handcrafted objects from the region, others a lot. Some are open seasonally with limited hours of operation. Please call the venue or check its web site to obtain the most up to date information.

Important: Dial-up vs. High Speed users. *This file is one of nine (one for each county), and contains only those listings for **Highland** County. Be sure to download the files for the other eight counties. Some files have many listings, others a few. **Alternately**, if you have a high speed connection you can easily view the entire nine county region by downloading the "Regional Directory."*

We hope you enjoy the listings and encourage you to visit as many counties as possible.
